

A photograph of a Ford car's interior, showing the steering wheel, dashboard, and center console. The steering wheel has the Ford logo and 'AIRBAG' text. The dashboard features a digital display showing 'RADIO < FM1 93.1 MHz 2:16'. The center console has a gear shifter with 'P R N D S' markings and various control buttons. Five blue callout boxes with white text are overlaid on the image, pointing to specific features. The overall lighting is bright, highlighting the car's interior details.

With MyKey enabled, the Belt-Minder chime continues at regular intervals and the audio system is muted until the safety belts are buckled

Incoming calls and texts can be routed directly to a paired phone without signaling the driver

MyKey provides an additional low-fuel warning at 75 miles to empty, earlier than the standard warnings that begin at 50 miles to empty

Can limit the entertainment system's audio to 45 percent of maximum volume

Can limit the vehicle top speed to 80 mph. Some vehicles allow for MyKey to limit the top speed at 65, 70 or 75 mph

Ford MyKey

A safety feature for fleet owners

Ford Motor Company's MyKey® is being used by fleet owners as a tool to encourage safer driving habits in employees. The MyKey feature – which is standard on almost all new Ford and Lincoln models – allows owners to program keys that can limit the vehicle's top speed and audio volume, and encourage safety belt use.
