While driving, Ford Police Responder Hybrid Sedan is projected to provide EPA-estimated combined gas mileage of 38 miles per gallon. While idling, the Police Responder Hybrid Sedan's battery helps save an estimated 0.27 gallons of fuel per hour. If the vehicle is driven 20,000 miles per year, runs two shifts per day, 365 days per year, idles 4.9 hours per 8-hour shift, and fueled at an average gas price of \$2.50/gallon, then Police Responder Hybrid Sedan customers could see nearly \$3,900 a year in potential fuel savings per vehicle relative to the Police Interceptor with 3.7-liter V6. Check out our Responder Fuel Calculator for more details.
