

Ford RANGER

101 Robots take approximately three hours to build one chassis in the body shop

One paint job takes approximately 12 hours and uses an average of

six litres of paint

The paint oven reaches 165° C

Assembling one Ranger, including the completed chassis, fitting the engine and transmission, painted panels and interior takes

six hours

from start to finish

Cars are **tested at -15°C** to guarantee cold weather durability

SILVERTON PLANT

THE FACTS

The world-class efficiency of SA's Ford Assembly Plant and its staff ensures that

every two minutes a full assembled Ranger rolls off the line

ready for final testing

Squeaks and Rattles Track

simulates various road conditions

Over

500,000

Ford Rangers have been assembled

at the Silverton Plant since September 2011

Parked end to end, they would stretch from the Ford Silverton Plant to Table Mountain in Cape Town - and back (2696 kilometres)
