REVEL AUDIO SYSTEMS

2024 LINCOLN NAUTILUS

THE ART OF LUXURY MEETS THE SCIENCE OF SOUND

Enjoy fully immersive and acoustic clarity with the available Revel® audio systems in the Lincoln Nautilus. Everything from the trim to the door handle placement was considered and designed from the ground up to ensure sonic perfection.

Revel's deep scientific foundation, home theater speaker design heritage and trademark sonic signature are all integrated into every Lincoln with a Revel audio system without a single compromise.

POINT SOURCE ARCHITECTURE maintains the close positioning between tweeters and midranges allowing a seamless blend, so that every detail of a song reaches a passenger's ears at the exact same time and magnitude.

REVEL WAVEGUIDES built into every door to optimize high-frequency dispersion and improve the acoustic performance across a wider space.

Black Label

DESIGN SPECIFICATIONS

Inspired by the pure nature of sound waves, the pattern flows smoothly outward from the speakers fully immersing the occupants. The surround 3D technology adds a new dimension in sound with 8 of the additional 14 speakers added to the headliner.
